Pierre Fabre Chooses DIS for the Implementation of Greek Localization for Microsoft Axapta 2012 R2

The Pierre Fabre Group, a global leader in pharmaceuticals and dermo-cosmetics, operates in Greece through Pierre Fabre Hellas and Pierre Fabre Pharmaceuticals, offering trusted brands like Avène, Ducray, Klorane, René Furterer, A-Derma, and a broad pharmaceutical portfolio. To support growth and compliance, Pierre Fabre partnered with DIS for the implementation of the Greek Localization of Microsoft Axapta 2012 R2.

DIS Dynamic Integrated Solutions

Pierre Fabre

Regulatory Compliance

→ Ensure full compliance with Greek tax, accounting, and regulatory standards, aligning all processes with local legal requirements.

Complex Operations Support

→ Support the company's complex operational processes across pharmaceuticals, dermo-cosmetics, and consumer healthcare.

ERP Integration

→ Seamlessly integrate the Greek subsidiary into the group's international ERP environment, maintaining consistency with global operations.

Risk Minimization & Business Continuity

→ Teams couldn't access or share up-to-date information efficiently.

Growing Business Complexity

→ Reduce operational risks and maintain business continuity during the transition to the new system, avoiding disruptions to daily operations.

DIS Greek Localization Implementation

→ Implement the DIS Greek Localization, covering accounting standards, VAT, e-invoicing, mandatory reporting, and myDATA compliance to meet local regulatory requirements.

Integration with International Systems

→ Ensure consistency with the group's international ERP systems while accommodating Greece-specific processes.

Change Management & Training

→ Provide comprehensive change management and staff training to guarantee smooth adaptation with minimal disruption to operations.

✔ **Full Regulatory Compliance**

→ Align processes with Greek tax, accounting, and reporting standards to ensure legal compliance.

✔ **Operational Efficiency**

→ Streamline and automate workflows in finance, supply chain, and reporting, improving overall business efficiency.

✔ **Global Consistency with Local Adaptation**

→ Harmonize local operations with the international ERP framework, ensuring both global consistency and local relevance.

✔ **Future-Ready Infrastructure**

→ Establish a robust, reliable foundation to support ongoing digital transformation and future business growth.
